#### **Subject: Application for an End-of-Studies Project Internship in Information Systems Development**

Dear Sir or Madam,

I am writing to express my interest in the internship opportunity within your esteemed organization. My name is Maha Krimi, and I am currently pursuing a degree in Information Systems Development at ISET Bizerte. I am eager to apply my technical knowledge and hands-on experience to contribute meaningfully to your team.

Throughout my academic journey, I have developed a strong foundation in various programming languages, frameworks, and tools. My recent projects include the development of a **Boycott Application** using **microservices architecture** (Spring Boot, Angular, Node.js, MySQL, MongoDB) and a **psychological services platform** with **Spring Boot** and **Vue.js** and others projects. These projects have equipped me with proficiency in full-stack development, mobile application design (using Kotlin), I have also worked with **Docker** for containerization and **Grafana** for real-time data visualization and monitoring.

In addition to my technical skills, I have honed my leadership abilities as the Chairwoman of **IEEE WIE AG at ISET Bizerte**, where I led various initiatives and developed organizational and teamwork skills. My strong analytical abilities and eagerness to tackle complex challenges enable me to adapt quickly and contribute to team success.

I am confident that my diverse skill set and passion for technology would allow me to make a valuable contribution to your company. I look forward to the opportunity to further discuss how I can support your team's objectives and grow professionally with your organization.

Thank you for considering my application. I am available at your earliest convenience for an interview.

**Sincerely,**

**Maha Krimi**
